SAFETY WARNINGS

BEFORE EVERY RIDE:

Just a minute spent before every ride can significantly improve your safety and the enjoyment of your ride. So, each time before you ride, make a habit of performing the following safety checks.

• Stand in front of the bicycle facing rearward and hold the front wheel securely with your right hand. Try to turn the handlebars and verify that they do not move. Then pull the handlebars up, try to turn the fork, and check the brake. There should be no movement of these components.

• Try to push the front wheel from side to side in the fork and confirm that it feels right and will not wobble. Lift the front wheel up by the handlebars and strike the wheel downward with the heel of your hand and confirm that it is tight. Spin the front wheel and confirm that it does not wobble or contact the fork or brake pads.

• To lift, push down on and twist the seat to confirm that it is tight.

• Look at the connections of the pedal to the crank arm. The pedal should feel firm.

• Apply your brake(s) and make sure that they feel firm to the touch, and then spin the wheel(s). Apply the brakes. They should stop the wheel(s).

Now, put on your bicycle safety helmet and enjoy your ride. Your safety is well worth just a minute. Also, be sure to read and follow the warnings and instructions in the Assembly, Maintenance and other sections of this manual.

MAINTENANCE CHECKLIST

Before every ride:

• Check wheel and pedal tightness
• Make sure all fasteners are tightened

After every ride:

• Clean and wipe down with damp cloth

MONTHLY:

• Check brake adjustment (if applicable)
• Check that wheels are true
• Check hub, head set and crank bearings for looseness
• Check pedals and handlebars are tight
• Check seat and seat post are tight and comfortably adjusted
• Check frame and fork are true
• Check all nuts and bolts are tight

COASTER BRAKE

It is not necessary to assemble any part of your coaster brake, but it is important to understand how your coaster brake works.

OPERATION:

Push the pedals backward to move the chain backward. The chain activates the coaster mechanism that is inside the rear hub. As you push the pedals backward with increasing force, the braking action of the coaster increases. If your bicycle has a caliper brake(s) in addition to the coaster brake, always use the coaster brake as the main brake to stop the bike.

FITTING TO THE RIDER

To determine the correct size of bicycle for the rider:

• Check that the assembled bike with foot shoulder width apart and flat on the ground.

• The minimum leg length for the rider is the highest point of the top tube (1) between the highest part of the top tube (2) and the center of the bottom bracket. The minimum leg length for the rider is the highest point of the top tube plus one inch (3).

SAFETY WARNINGS

MAINTENANCE

Regularly examine all parts for wear or damage before use.

• Before each ride, check for cracks or other damage to the bike.

• Check all hardware such as bolts, nuts, cables, and other parts to ensure they are properly and securely assembled. If you hear any rattling from loose parts, the unit is damaged and should not be used.

• Immediately replace any damaged, missing, or body worn parts with original equipment.

• Only use parts and accessories approved by the manufacturer and included with the product at the point of sale. All other parts and accessories are not approved for use with the bike and could damage the unit or cause injury to the rider.

SAFETY WARNINGS

BEFORE RIDING:

Your new bike was assembled and tuned in the factory and then disassembled for shipping. The following instructions will enable you to prepare your bicycle for years of enjoyable cycling. For more details on inspection, maintenance and adjustment of any parts of the bicycle, please refer to the relevant sections in this manual.

If you have questions about your ability to assemble or assemble your bike, please consult a professional bicycle mechanic before riding.

**ASSEMBLY**

1. **Remove and discard the wheel nut protectors on the front (2) and rear (3) wheels.**
2. **Insert the metal pin into the hole above the axle on the fork.** Then, insert the fork (C) over the wheel. Replace a metal pin, a washer and a nut, in that order, to each side of the wheel.
3. **Loosen the screw 1/4 turn with the Allen wrench.** Push in the button on the center of the pedal, then rotate 180 degrees. Then, reattach the pedal into the clip.
4. **Rotate the pedal arm out until it locks in place.** TIP: If the pedal arm is tight and won’t rotate, loosen the screw 1/4 turn with the Allen wrench. Tighten after rotating pedal arm.
5. **Insert the handlebar into the frames (A). Adjust the height of the handlebar and tighten with the Allen wrench.** Then, loosen the clamp protector over the clamp.
6. **Unhook the right pedal from the clip.** Rotate the pedal arm out until it locks in place.
7. **Lock the pedal into the clip.**

**BIKE POSITION**

**RIGHT PEDAL**

1. **Slide in the pedal until the buttons snaps back in place.**
2. **Rotate the pedal arm out until it locks in place.** TIP: If the pedal arm is tight and won’t rotate, loosen the screw 1/4 turn with the Allen wrench. Tighten after rotating pedal arm.
3. **Use the Allen wrench to loosen the bolt 3 full turns.** Remove the pedal arm and rotate 180 degrees. Then, reattach the arm and tighten the bolt.
4. **Push in the button on the center of the pedal to slide it out so that the pedal can rotate.

**LEFT PEDAL**

1. **Slide in the pedal until the buttons snaps back in place.**
2. **Use the Allen wrench to loosen the bolt 3 full turns.** Remove the pedal arm and rotate 180 degrees. Then, reattach the arm and tighten the bolt.
3. **Push in the button on the center of the pedal to slide it out so that the pedal can rotate.**

**LIMITED WARRANTY**

The Little Tikes Company makes no, high quality products, we refer to the limited warranty of this product is free of defects in material or workmanship for one year from the date of purchase (dated sales receipt is required for proof of purchase). At the sole election of The Little Tikes Company, the only remedies available under this warranty will be the replacement of the defective part or replacement of the product. This warranty is valid only if the product has been assembled and maintained per the instructions. This warranty does not cover abuse, accident, cosmetic issues such as dents or scratches from normal wear or any other causes not arising from defects in material and workmanship. The warranty period is three (3) months for daycare or commercial purchasers. U.S.A. and Canada: For warranty service or replacement part information, please visit our website at www.littletikes.com, call 1-800-321-0183 or write to: Consumer Service, The Little Tikes Company, 2180 Barlow Road, Hudson OH 44236, U.S.A. Some replacement parts may be available for purchase after warranty expires—contact us for details.
